Rosco IFF Rinks

FLOORBALL
RINK

5 mm polypropylene bended in the bottom edge from one sheet without welding between the horizontal and vertical part

All the pieces are long 2 or 1 meter and high 0,5 m. The top bar is made by a rounded resistant 15 mm polypropylene bar

HEAVY VERSION: ensure even better stability from standard version by adding a stripe of 5 mm material in the horizontal part of the rink segments

connection of all pieces of the rink made by 2 joints and strong rubber

Special storing support part: it helps to store the rinks pieces in the right position on the trolley

corners are produced in one piece and the radius is 1,5 m
